This is Eve.

100% Privacy

No Eve cloud, no registration and no tracking so your data won't get exposed. Local intelligence and direct communication between Eve devices and smartphones or hubs without cloud dependency.

Seamless Integration

Award-winning design, easy installation: Eve devices are Apple HomeKit- or Matter-enabled for effortless communication with other vendors' devices.

Future-Proof Technology

Eve delivers state-of-the-art connectivity via Thread or Wi-Fi, implements the future-proof Matter standard and constantly expands each device's feature-set through updates.

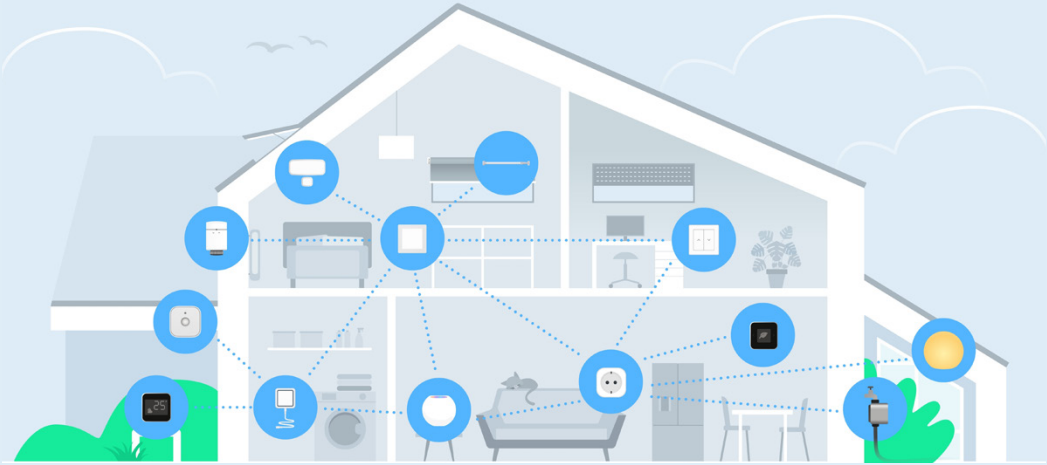
Say hello to Thread.

Thread makes your smart home more responsive and robust, and is one of the pillars of Matter, the smart home standard of the future. This is why Eve is embracing Thread: all current Eve devices that support Bluetooth now also support Thread.

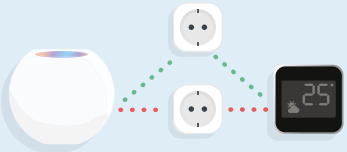
Thread technology is specifically developed for smart home applications to improve connectivity between devices. The big difference with this technology is that Thread creates a mesh network. Within this, lights, thermostats, outlets, sensors, and more can also talk to each other free of the constraint of having to go through a central hub, such as a bridge. If a single device fails, the data packets are simply relayed to the next in the mesh.

BUILT ON THREAD



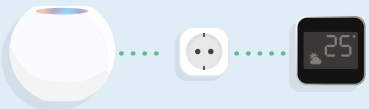
Eve offers the world's largest portfolio of Thread-enabled devices, all of them ready to be updated to Matter with a free firmware update. Updates introducing Matter support for the first Eve devices are already available – so if you purchase a Thread-enabled Eve device today, you're already prepared for Matter.

Thread Benefits



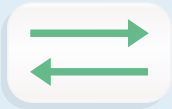
Robust, self-healing network

If one device in your Thread network fails, the next one fills in. Thread scales up easily and actually becomes more robust with every new device, unlike Wi-Fi and Bluetooth networks which become more unreliable and challenging to manage with a high number of devices connected.



Always in reach

If one of your devices is beyond the actual reach of your Thread Border Router, a mains-powered device placed somewhere in the middle that's always on, such as Eve Energy, can connect it to the Thread network.



Instant response

Thread was designed specifically to enable both mains-powered and battery-operated devices to be extremely responsive regardless of network size and density.

No bridge

Thread devices don't need a proprietary bridge to communicate with each other – they simply need a Thread Border Router.

Future-Proof (Matter)

Thread is a pillar of the new smart home standard Matter. All Thread-enabled Eve devices will receive free firmware updates over time – so if you purchase a Thread-enabled Eve device today, you're already prepared for Matter.

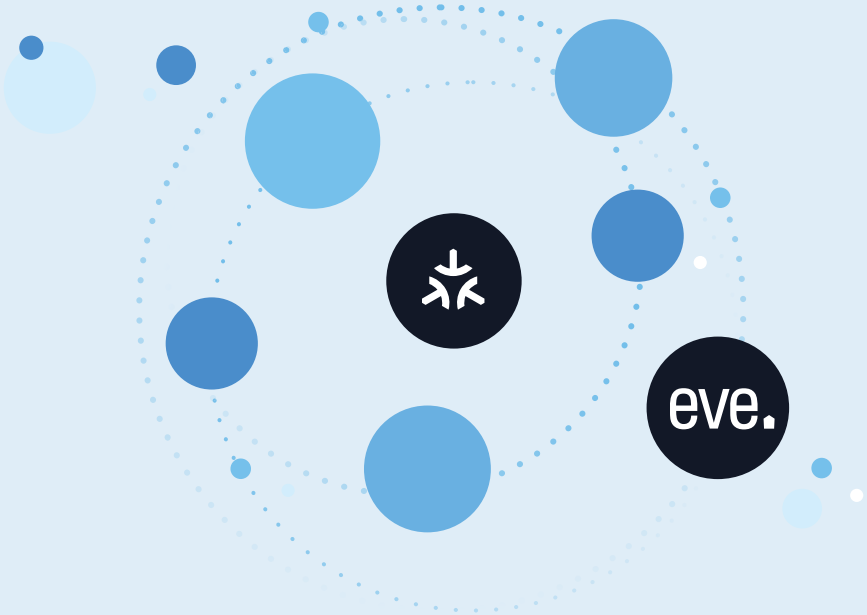
Longer battery life

Batteries last much longer thanks to Thread's extremely low power consumption.

Welcome, Matter!

Matter is here – and the first Eve devices are ready to be used with the new standard for smart home devices.

Adding Matter-enabled Eve devices to your smart home is fast and easy – the only other thing you need is the right hub. Which hub is right for you depends on which smart home platform(s) you'd like to control your home with. All compatible hubs can be found at evehome.com/hub.



matter

Designed around interoperability and platform independence, making it easy to control your smart home devices securely from any platform you choose: the future of smart home is called Matter, and that future is now.

Works with Apple Home

Works with SmartThings

works with alexa

works with Google Home

Made for everyone in your home.

Matter-enabled devices are a breeze to integrate into your smart home. Your entire family can control your home through their preferred voice assistant or app. That's because Matter doesn't mind if you use an iPhone, Android device or call upon Alexa, Siri or Google Assistant.

Cutting-edge connectivity.

Matter devices truly shine when they talk via Thread. This groundbreaking network technology makes your smart home more responsive, robust, and increases its reach. That is why all Eve devices embrace Thread.

Upgrade your existing Eve devices to Matter.

If you have purchased a Thread-enabled Eve device in the past, and want to leverage Matter to use your Eve devices from an additional platform, you're eligible for a free firmware upgrade.

eve energy

Smart Plug and Power Meter

matter

BUILT ON THREAD

Switch your lights and appliances on and off using your voice or an app, and control them from afar. Eve Energy features future-proof technology with Matter, cutting-edge Thread networking, and no tracking whatsoever – for a universal and rock-solid smart home that honors your privacy.

eve energy strip

Connected Triple Outlet

Works with Apple Home

WiFi CERTIFIED

With Eve Energy Strip, individually control three outlets with the app or Siri. Put devices on autopilot. And safeguard appliances with overcurrent, overvoltage, and surge protection. Crafted to perfection, Eve Energy Strip is the ultimate power distributor you won't want to conceal.

eve thermo

Smart Radiator Valve

Works with Apple Home

BUILT ON THREAD

Control your room temperature with ease using the app, Siri, schedules, the integrated touch controls, or based on your presence. Eve Thermo synchronizes your heating based on your routine: save energy when away from home or make your place a cozy haven of relaxation when you're there. Eve Thermo will receive a free firmware upgrade to Matter soon.

eve thermo control

Temperature Sensor & Controller

matter

BUILT ON THREAD

Comfort and convenience on the spot. In combination with Eve Thermo radiator valve, Eve Thermo Control measures and maintains your desired temperature automatically according to its location in the room. And, if you want it cozier, you can set the new desired temperature directly on the device – all from the comfort of your sofa. The heating duo uses the new smart home standard Matter to communicate directly, taking comfort, convenience and ease of use to a whole new level. Eve Thermo Control will be available soon.

eve room

Indoor Air Quality Monitor

Works with Apple Home

BUILT ON THREAD

Eve Room is your key to healthy living. The award-winning indoor air sensor with Apple HomeKit technology measures volatile organic compound (VOC) concentration, temperature, and humidity levels in your home. View the readings on the integrated display or on your iPhone, and adopt healthy habits by following the history in the Eve app.

eve door & window

Wireless Contact Sensor

matter

BUILT ON THREAD

Know the status of your door or window. See the open/closed state at glance, create automations to control other connected devices throughout your home, and receive activity notifications. Plus, automatically pause heating while ventilating when you combine it with Eve Thermo. Eve Door & Window features future-proof technology with Matter, cutting-edge Thread networking, and no tracking whatsoever – for a universal and rock-solid smart home that honors your privacy.

eve motion

Wireless Motion Sensor

matter

BUILT ON THREAD

Let your presence bring your home to life. Control your lights and appliances via movement, and receive notifications when motion is detected. Eve Motion features future-proof technology with Matter, cutting-edge Thread networking, and no tracking whatsoever – for a universal and rock-solid smart home that honors your privacy.

eve water guard

Connected Water Leak Detector

Works with Apple Home

BUILT ON THREAD

Leave your home even with the washing machine running. Enjoy complete peace of mind knowing that no water's leaking in the cabinet beneath those water pipes. And keep a watchful eye on the basement, even though you don't go there that often. Eve Water Guard detects water leaks and alerts you the moment they occur – visually, audibly and via an app on your iPhone.

eve cam

Smart Indoor Camera

Works with Apple Home

WiFi CERTIFIED

Keep a close eye on your home around the clock and protect the privacy of your personal space in the process. Receive rich notifications on your iPhone immediately when something is up in your home. Eve Cam is designed exclusively for Apple HomeKit Secure Video and was built from the ground up to protect your privacy.

eve outdoor cam

Secure Floodlight Camera

Works with Apple Home

WiFi CERTIFIED

Keep a close eye on your home around the clock, and receive rich notifications on your iPhone when something is up. Eve Outdoor Cam packs advanced technology into a sleek metal enclosure and is designed exclusively for Apple HomeKit Secure Video, built from the ground up to keep your data secure and your private space safe.

eve flare

Portable Smart LED Lamp

Works with Apple Home

BUILT ON THREAD

With Eve Flare, set the perfect ambience with a quick tap or Siri voice command. Enjoy 6 hours of untethered illumination, wireless charging, plus IP65 water resistance. Explore ready-made shades or fine tune your own. And indulge in the aura of any color you wish, anywhere you want.

eve light strip

Smart LED Strip

Works with Apple Home

WiFi CERTIFIED

Activate the ultra-bright 1800 lumens of light on Eve Light Strip for whole-room ambience, or dim to a subtle glow of understated elegance. Choose from any shade of white and millions of colors that you control via Siri or the app – or let HomeKit Adaptive Lighting adjust the color temperature automatically throughout the day.

eve light switch

Connected Wall Switch

Works with Apple Home

BUILT ON THREAD

Enjoy the convenience of connected lighting with Eve Light Switch without replacing a single bulb in your home. Turn your lights on or off via app or Siri, and effortlessly set up schedules that put your lights on autopilot, turning them on and off independently of your iPhone or internet connection.

eve aqua

Smart Water Controller

Works with Apple Home

BUILT ON THREAD

With the Eve Aqua smart water controller, activate your irrigation system via your iPhone, Siri, or the onboard button. You can also set up schedules quickly and easily, and let Eve Aqua take care of watering your garden and patio plants – completely automatically without requiring an internet connection, a bridge, or a gateway.

eve weather

Connected Weather Station

Works with Apple Home

BUILT ON THREAD

With Eve Weather, track your current outdoor temperature, humidity and barometric pressure, and see the weather trend at a glance – on your iPhone or directly on the display. Review current and past climate data, empowering you with insights of the weather on your doorstep.

eve shutter switch

Smart Shutter Controller

Works with Apple Home

BUILT ON THREAD

Enjoy the convenience of smart shading. Control your shutter using the app or Siri, or effortlessly set up schedules that move your shutter automatically – independently of your iPhone or home network. Keep your room a comfortable temperature with Adaptive Shading and create scenes to control all your shutters at once with one command.

eve blinds collection

Made-to-Measure Smart Blinds

matter

BUILT ON THREAD

The Eve Blinds Collection is a curated collection of made to measure blinds featuring Eve MotionBlinds technology and, most notably, Eve's own Adaptive Shading function. Available through the Eve app for iOS, it lets roller blinds with Eve MotionBlinds technology automatically close according to the position of the sun.

eve. | MOTIONBLINDS

Upgrade Kit for Roller Blinds

Works with Apple Home

BUILT ON THREAD

Upgrade your existing blinds with Eve MotionBlinds Upgrade Kit and enjoy the convenience of smart shading. Control your blinds via app or voice, or easily set schedules that automate your blinds to suit your daily routine. Eve MotionBlinds Upgrade Kit is available to receive a free firmware update to Matter.

eve play

Audio Streaming Interface

Works with Apple AirPlay

Works with Apple Home

WiFi CERTIFIED

With Eve Play, stream music via AirPlay to existing amplifiers, active speakers or soundbars conveniently and in high fidelity. Encased in an award-winning design, the high-end audio adapter connects stereo systems to your home network for convenient music playback directly from your Apple devices. This way, your tried-and-tested Hi-Fi system becomes the new star of your multi-room setup.
